City of Newport Notice of Public Hearing FONSI: Gardner Park Siphon & Sewer Upgrade

Notice is hereby given to the residents of Newport VT that the Newport City Council will hold a public hearing as part of its regular Council meeting scheduled for February 2nd, 2026 at 6pm. The hearing will be held in the council room of the Municipal building at 222 Main St, Newport VT. It will be fourth on the agenda, following the opening of the meeting and the consent agenda.

Background: The City of Newport is designing a project to improve and rehabilitate the existing sewer collection system infrastructure. The project consists of installing a redundant siphon under the Clyde River via horizontal directional drilling and the rehabilitation of the existing siphon and sewer collection system within Gardner Park via cured-in-place-pipe (CIPP).

Project Description: The proposed project consists of two components: a new redundant siphon and rehabilitation of the existing sewer collection system. The new 8" high density polyethylene (HDPE) siphon will be installed via HDD, a trenchless technology, under the Clyde River.

More information is available upon request through the City Office.
